

2023 IBS-CALDES Seminar

- ✓ **Date & Time:** 2:00PM~4:00PM, November 14 (Tue), 2023
- ✓ **Venue:** IBS POSTECH Campus Bldg. 104 (Auditorium)
- ✓ **Speaker:** Prof. Je-Geun PARK (Seoul National University)
- ✓ **Title:** “Beginning, present and future of two-dimensional van der Waals magnets”

Organized by Prof. Han Woong YEOM(yeom@postech.ac.kr, 054-260-9000)
Dr. Jhinhwan LEE (jhinhwan@ibs.re.kr, 054-260-9014)

■ **2:00PM~4:00PM**

Beginning, present and future of two-dimensional van der Waals magnets

Je-Geun Park

Department of Physics & Astronomy, Seoul National University

Have you ever thought about how a new physics, small or big, starts? You may, perhaps, many times. Sometimes agonizingly, I am afraid. Yes, we all dream about having something of our own and as a scientist, we have always strived to achieve this dream. But how?

In this talk, I would like to take you through a small but painful journey I dared to take over the last ten years or so. My story is about how I started a then-unknown field of van der Waals magnets. I will tell you about how I started and how it has emerged as one of the most vibrant fields in materials science.
